

Duspol and Tester > Benning VT 1 Non-contact Phase Indicator and Magnetic Field Tester (044055)

Benning VT 1 Non-contact Phase Indicator and Magnetic Field Tester (044055)

Item name: Benning VT 1 Non-contact Phase Indicator and Magnetic Field Tester (044055)

Manufacturer : Benning

Model : 044055

Non-contact Phase Indicator and Magnetic Field Tester

For quick and easy phase testing of sockets, distribution boxes, switches and lamps. Locates cable breaks and defective lamps in chains of light and insulated cables.

Magnetic field testing of valves, switches, relays, pumps, solenoid coils.

- phase (external conductor) testing on shock-proof sockets, distribution boxes and automatic circuit breakers etc. by means of red LED probe tip and acoustic signal
 - magnetic field test via green LED probe tip (magnet is activated)
 - testing of permanent, AC-induced and DC-induced magnetic fields
 - integrated test magnet for functional test
 - localization of cable breaks and interruptions in insulated and live lines, e.g. in cable reels and in chains of lights
 - voltage range: 200 V - 1000 V AC
 - high sensitivity for 12 V voltage range can be activated via the push-button
 - non-contact testing, no contact to the electrical conductor required
 - the flashing frequency of the LED probe tip as well as the frequency of the acoustic signal increase with the voltage applied increasing as well
 - capacitive measuring method requires no current flow
 - battery compartment can be opened easily via robust screw cap
 - automatic switch-off (AUTO Power-OFF)
 - highest measuring category CAT IV 600 V
 - break-proof ABS housing
